june 22–26 astronaut training

We will be going to Mars in 25 years according to NASA. That puts our students at the right age to lead these exciting journeys, so let's get a head start on training! This hands-on program designed with NASA explores all atmosphere, solar system and space phenomena as well as the forces of flight, living in space and the challenges of space travel. Children will build their own Sky Blazer rocket and experience a real rocket launch. Cool take home projects as well.

Location: Largo Community Center
65 Fourth St NW

july 6–10: engineering mania

Junior scientists are needed for this hands-on week where we will build and test buildings, bridges and other structures. Fundamental forces and air pressure will be explored, and test pilots are needed to fly our special craft to test different physical forces. Make indoor lighting, and have a real "hair raising" experience as we work with electricity and how to design circuitry. The fun will never end as we explore the science of magic and toys. Take home projects every day.

Location: Largo Feed Store
295 Central Park Dr

august 3–7: pure science fun!

We will be focusing on FUN and EXCITEMENT this week as we utilize the best from our exciting collection of parties and special events to remind children just how much fun science actually is. Plenty of cool demonstrations and exciting hands-on activities will involve amazing chemical reactions, special effects and fantastic forces. Cool take home projects as well.

Location: Largo Community Center
65 Fourth ST NW
